

## Field-to-Office ArcGIS Kickstart

### High Accuracy GPS Direct to your web-based GIS

Cloudpoint Geospatial's Kickstarts are short-term, high impact services that provide set-up, knowledge transfer, and consulting support. The DA2 is Trimble's® smallest receiver, paired with the Trimble Catalyst™ GNSS positioning service that feeds directly into your GIS. ArcGIS Online is Esri's web-based platform for creating, editing, and sharing your GIS data. These affordable offerings give municipalities of any size the power to maintain the location and attributes of their assets in both the field and the office.

### What do you get with a Field-to-Office ArcGIS Kickstart?

#### GNSS Data Collection Bundle

- ◆ Trimble DA2 GNSS Unit
- ◆ Range Pole with BiPod
- ◆ Data Collection Kit: iPad, protective case, pole mount
- ◆ Set-up of mobile applications
- ◆ Trimble Catalyst on Demand - 100 Hour Pack (to be used within 12 months)
- ◆ Catalyst 1 subscription provides up to **1 cm accuracy horizontally** and approximately **2-6 cm vertically\***

#### ArcGIS Online Setup

- ◆ Two basic configured Esri Solutions or Web Applications
- ◆ Two additional layers with up to five custom fields
- ◆ One Operations Dashboard for monitoring collected data
- ◆ Layers and applications can be populated with existing CAD or GIS Data

#### Training and Knowledge Transfer

- ◆ 4 hours of data collection training (on-site)
- ◆ 4 hours of ArcGIS Online training (on-site or virtual)
- ◆ Block of 24 hours for remote GIS support (to be used within 12 months)

\*actual accuracy will depend on the method of collection and environment
